ESOF - Logo construction
ESOF - Graphic elements - The star - Do and dont’s

Graphic element - primary colour

Graphic element - secondary colour
CONCEPT

A friendly science, going beyond specialization and borders, shared, spreading universal ethical values, aware of all aspects of life: this is the meaning of the Star/Nucleus/Spark symbol, which is combined with the ESOF logotype throughout the various communication materials. The combination of this symbol in a spherical web evokes the vision of a world where the spreading of science and its material and immaterial products unites all the peoples of the world.
